## Commercial U.are.U Solutions

Spanning an ever increasing range of industries and application types, developers have embraced the compelling business value of fingerprint biometrics. There are common themes that express themselves and provide the following benefits across these industrial applications:

- **Enhance Accountability** - Knowing, for sure, who does what, where, and when.
- **Increase Productivity** - Simple "Touch and Go" secure access to networks, buildings, applications, and documents.
- **Prevent Fraud** - Prevent people from using lost or stolen credentials to steal goods and services.
- **Simplify Compliance** - Control and audit access to personal and financial data.
- **Reduce IT Costs** - Eliminate provisioning and maintenance costs associated with passwords, tokens, and swipe cards.

We are pleased to share with you the many industry solutions that have incorporated DigitalPersona fingerprint biometric technology:
